

# Get paid faster, chase less

Adfin is a UK payments platform for businesses that invoice.

It takes payment whatever way your customers want to pay, and chases the late ones for you, automatically.

## WHAT YOU GET

- **One payment link, every way to pay**  
Card, bank transfer, direct debit, Apple Pay and Google Pay. If one way doesn't go through, Adfin offers another automatically.
- **Chasing that runs itself**  
Reminders go out automatically by email, WhatsApp and SMS, on a schedule you set.
- **Credit control in one place**  
One dashboard shows what's owed, what's overdue and what's been chased.
- **Invoices from anywhere**  
Bring them in from Xero, QuickBooks and other systems, or upload them in bulk, in any format.
- **Money in your account daily**  
Get paid out in full daily, so you're not waiting a week to see your cash.

## A CUSTOMER STORY

"I've got a team of smart, dedicated people building software to **solve my biggest business problems.**"

### Impacts:

- **3x** as many invoices paid on time
- **Consolidating** 4 tools into 1
- **58%** reduction in payment collection costs

Alex Eames, CEO

**Helpbox**  
Accountancy made smarter

## WHAT IT COSTS

**1% + 20p**  
per successful payment

You only pay when a payment succeeds. Bank transfer and direct debit are capped at £4.
